Scenario: You're a second year in college. After your first year, you were feeling confident going into your second. However, in that time, Covid-19 struck and now most of your classes are online and your organization has gone out the window. You would like an app on your phone to help get back on track.

Task 1: Give the times and locations of U101.

Task 2: Find out if there is tutoring available for any classes in Green Quad.

Task 3: Find a minor best suited to you.

Notes:

Things to change-

- Make the chart under schedule more clear
- Offer a link if tutoring is online
- Give each class an individual page with more information

Things to keep the same-

- The minor finder; thought it was useful and cool
- Having a chart with every class and assignment for each day was useful
- Having additional resources for every class is very helpful
